

Titan SAR display inputs and modal map labels

Plains

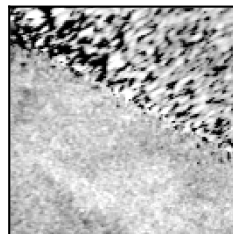

titan_005521
Map class 97.53%
Valid SAR 100.00%
45 km width

Dunes

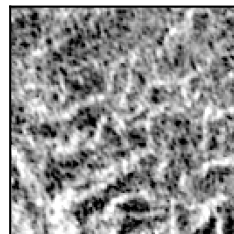

titan_018977
Map class 95.36%
Valid SAR 100.00%
45 km width

Hummocky

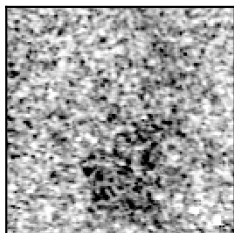

titan_020489
Map class 77.73%
Valid SAR 100.00%
45 km width

Labyrinths

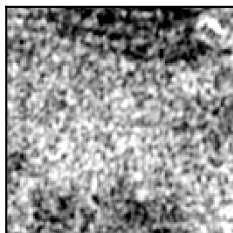

titan_000979
Map class 80.20%
Valid SAR 100.00%
45 km width

Lakes

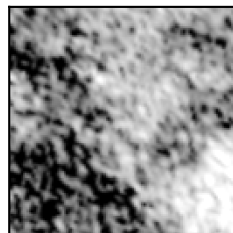

titan_012826
Map class 83.64%
Valid SAR 100.00%
45 km width

Craters

titan_025578
Map class 80.08%
Valid SAR 100.00%
45 km width

Plains
Mixed map footprint

titan_014671
Map class 45.24%
Valid SAR 100.00%
45 km width

Mixed map footprint:
modal class covers <50%
of valid map samples.

Only the modal fraction
is available in the catalog.

Invalid SAR pixels
where present

Map: modal class fraction of valid map samples. SAR: valid pixel fraction from a separate mask.
USGS Cassini SAR/HiSAR display DN. Independent 2nd to 98th percentile stretch per tile.
Selected by map-fraction medians from the current test union. Panel brightness is not comparable.
The examples illustrate catalog labels and image appearance. Their geological representativeness is untested.
